

Postdoctoral Scholar for NSF-funded Project on Faculty Transdisciplinary Curricula Development and Teaching

Position: Full-Time

Start date: Immediate, but no later than Oct 15, 2023

Remote or in-person work available, with limited travel

Funding through Sept. 2024, with the potential for additional renewal

The Oregon State University College of Education seeks a full-time postdoctoral scholar. This position contributes to evaluation and research on an NSF-funded project that supports faculty across disciplines and institutions to create and implement undergraduate transdisciplinary curricula concerning sustainability. The project involves dozens of faculty and administrators at three universities.

Postdoctoral work will include revising evaluation and research tools and frameworks, gathering data, analyzing data, and preparing and delivering oral presentations and written reports and papers.

Additional responsibilities may include coordinating and strategizing project evaluation activities, contributing to project reports to funder, project strategizing, and limited outreach and engagement. The postdoctoral scholar is needed immediately, to conduct and analyze interviews, analyze data, and write reports and papers for publications.

The postdoc will work as part of a project research and evaluation team, including another Postdoctoral Scholar.

Required qualifications include:

- Doctorate in the Education Sciences or related fields
- Experience and/or interests in postsecondary-focused educational research
- Experience in data management and analysis in the social sciences

- Experience in creating data dissemination products for diverse stakeholders
- Evidence of excellent writing and communication skills
- Ability to work independently and collaboratively on a team and complex projects
- Excellent organization skills and attention to detail
- Demonstrable commitment to promoting and enhancing diversity, equity, inclusion, and justice

Preferred qualifications include:

- Experience teaching or leadership in education
- A background in STEM or STEM education

To apply, please send the following to Dr. Jana Bouwma-Gearhart (jana.bouwma-gearhart@oregonstate.edu)

- Curriculum vitae
- Transcripts from your doctoral program (unofficial are acceptable)
- A letter summarizing your relevant qualifications/experiences, expertise, and interests
- Contact information for three references
