

GRAD courses in spring term

GRAD 599 Creating Happiness - Corvallis, 1 credit. Life is busy and hectic. Have you stopped to intentionally find ways to slow it down or learn ways to increase your happiness with life? This course provides a one hour-intentional pause to take stock of your well-being and apply theories of positive psychology and mindfulness more readily into your life and course of study/profession.

WR/GRAD 599 Scientific and Technical Research Writing - Corvallis, 3 credits. Scientific and Technical Research Writing is for graduate students who are looking to practice writing and communicating about their research and learn more about how writing is accomplished in their field of study. Students do not need to come into the course with a data set and can be at any place in their graduate program.

GRAD 520 Responsible Conduct of Research - Online and Corvallis, 2 credits. Covers 10 topics in responsible conduct of research. Useful to all students who conduct scholarly activity.

GRAD 542 The Inclusive Classroom: Difference, Power and Discrimination - Online, 3 credits. An examination of multidisciplinary scholarship

on difference, power, and discrimination; critical pedagogies; and curriculum transformation. Discussions of theory and research are coupled with practical hands-on opportunities for students to develop and hone their teaching and course development skills.

GRAD 561 Course Design and Methods for College and University Teaching - Online, 3 credits. Students will explore research and best practices related to teaching and learning in higher education contexts, with emphasis on course design, facilitation, and other instructional techniques for GTAs, instructors, and others who teach in the college and university classroom.

GRAD 530 Introduction to Scientific Diving - Corvallis, 4 credits. Incorporates academic, confined water and open water training to prepare the student to manage the task loading associated with performing scientific tasks underwater. Introduces the diver to basic techniques and equipment used in underwater data collection. Qualifies the student for acceptance into the OSU Scientific Diving Program as a Scientific Diver-in-Training, at the discretion of the DSO and OSU Diving Control Board. Includes field trips.

Gain teaching skills with CIRTL
